

Maximum Performance Ported Cylinder Subwoofers

PC12-Plus

PC12-Plus – Extreme Performance Powered Cylinder

The original SVS subwoofer was a cylinder design, and this unique and elegant form factor has since become an iconic symbol of SVS performance heritage. With its generous enclosure size, triple high-flow ports, high-power amp, and heavy-duty woofer, the PC12-Plus has the power, headroom, and deep bass dynamics to easily handle the most demanding DVD passages at cinema playback levels in larger home theater rooms. Music is equally well-rendered – rock, jazz, pipe organ or classical – the PC12-Plus handles it all with accuracy and fidelity.

Specifications:

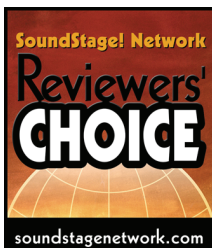

- Down-firing SVS 12" Plus Driver with integral base plate
- STA-800D Sledge, 800 watt amplifier
- High-grade black fabric exterior cover

- Dims: 40-1/4" (H), 16-5/8" (OD)
- Weight: 75 pounds

Maximum Performance Ported Cylinder Subwoofers

PC12-Plus

Compact Footprint, Efficient Performance and Versatile Tuning

With only a 16.5" diameter footprint, the PC12-Plus will fit into almost any location, and no other subwoofer design offers more bass performance per square inch of floor space. Using vertical height to achieve a generous enclosure volume and deep-tuned porting, the PC12-Plus effortlessly reproduces the deepest bass notes with stunning authority. The PC12-Plus offers our trademark variable tuning to accommodate different size rooms and deep extension requirements. Finished in high-grade black velour fabric, this unique and elegant subwoofer will complement the most upscale décors and high-end theaters.

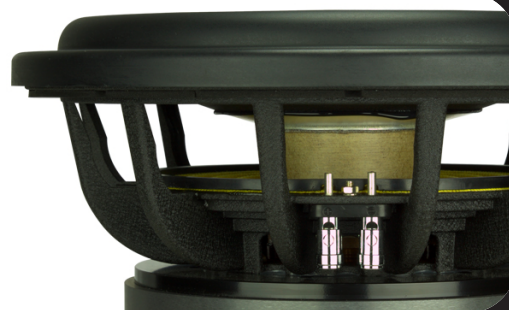

"The SVS PC12-Plus is an extremely versatile subwoofer that plays both music and film soundtracks in a way that belies its paltry asking price...Highly recommended."

-Howard Kneller
Sound Stage, April 2009

Plus-12 Woofer – Rugged and Refined

- FEA-optimized motor with copper shorting sleeve to reduce gap induction and distortion.
- Bifilar wound, 3" diameter, high-power aluminum voice coil.
- Dual linear-roll spiders and stitched parabolic surround for extreme excursion capability.
- Ultra-light and rigid composite cone provides excellent transient response.

Sledge Amplification – Intelligent and Sophisticated Power

- 800 watts of efficient, Class D power with 'green' standby mode.
- Stereo line-level RCA and balanced (XLR) I/O connections
- DSP control for ultimate in refined behavior under all operating conditions.
- Variable tuning with 20Hz, 16Hz, and Sealed settings to match any room.
- Extensive menu options and digital crossover allows easy integration into any 2-channel system.
- Intuitive and easy to use single knob controller with bright LCD display.
